

## O'RING KITS

ROYALTEK, in view of a continuous renewal of its products range, is glad to introduce the new oring kits.

It is useless to underline the importance of this product.

The applications can be various.

The Kit can be used in car and motorbikes repairation shops, on the earthmoving machineries, for industrial reparations, in the hydraulic, nautical and other different fields.

The Kit offers a great help when original parts are not available or correct sizes are not known.

What is the good reason to buy a Royatek kit rather than one of the competitor?

ROYALTEK kit is totally produced in Italy

All raw materials are of European origin and the kit is completely made in Italy (no regenerated materials are used).

Careful checks on th parts are made with highly sophisticated automatic machines.

ROYALTEK offers two different kinds of oring kits in NBR 70 material:

METRIC: it contains 414 pieces  
INCH: it contains 364 pieces

Both of them have an assortment of 30 measures and different cross section. The Orings are separated into the box and each measure is easy to find as marked on the box

ROYALTEK is a guarantee of high performance of its products as all of them are realized according to high quality standards that always distinguish our company
